Summary

- Self-motivated and enthusiastic Full-Stack Developer with hands-on experience in React, Next.js and Spring Boot.
- Solved **400+** DSA problems on LeetCode, showcasing solid problem-solving and coding proficiency.
- Practical exposure to cloud technologies (AWS) and relational databases including MySQL and SQL Server.
- Eager to learn, explore new technologies, and grow in an agile, collaborative environment with a strong growth mindset.

Experience

Salesforce India

Software Engineering Intern *Dec 2023 – Jan 2024*

- Created a centralized dashboard for managing domain credentials and renewal schedules.
- Implemented JWT authentication with role-based access control for secure usage.
- Built encrypted data storage and REST APIs using Spring Boot and MySQL.
- Automated renewal reminder emails using scheduled tasks in Spring Scheduler.

Projects

AcadElevate - Faculty Appraisal System *(React, SpringBoot, MySQL, LLM)* Oct 2024 – Jan 2025

- Built a faculty self-appraisal system with real-time tracking and automated email notifications.
- Developed a Career Recommendation Engine using a RAG pipeline to analyze and retrieve relevant insights.

ResumeRender - Resume Builder *(Next.js, Zustand, react-to-print)* Jul 2025 – Aug 2025

- Developed a resume builder web app with **300+** active users and optimized scalable deployment.
- Implemented live preview, dynamic templates, PDF export, and ATS-friendly formatting.

Lang2SQL - Database AI Agent *(JavaScript, Gemini API, React, Express)* Sep 2025 – Oct 2025

- Created an AI agent to convert natural language queries into SQL using LLM-based query optimization.
- Implemented schema-aware execution with real-time database interaction and data visualization.

Blockchain-Based AI E-Notary System *(Next.js, Express, Ethereum, IPFS, LLM)* Jan 2026 – Mar 2026

- Built a decentralized E-Notary platform to verify document authenticity using blockchain and SHA-256 hashing.
- Integrated IPFS for decentralized file storage and an AI-powered RAG system for document querying and insights.

Education

B.P. Mandal College of Engineering, Madhepura Bihar, India

B.Tech in Computer Science and Engineering | CGPA: 8.8 *Nov 2022 – May 2026*

Technical Skills

- **Languages:** Java, JavaScript, Python, SQL, HTML5, CSS
- **Frameworks & Tools:** Spring Boot, React.js, MySQL, Git, Postman, IntelliJ, VS Code
- **Core Concepts:** Data Structures and Algorithms, Object Oriented Programming, Problem-solving, SDLC
- **Test and Debug:** Tracking Bugs, Manual Testing, Integration Testing, Test Case Writing
- **Soft Skills:** Communication and collaboration, Analytical Abilities, Quick Learner

Achievements & Activities

- Qualified **GATE 2026**, demonstrating strong understanding of core Computer Science fundamentals.
- Achieved a LeetCode contest rating of **1505**, demonstrating strong algorithmic and problem-solving ability.
- Serving as **GDG Web Dev Lead**, conducting workshops and mentoring peers in web technologies.
- Contributed to Smart India Hackathon **2024 & 2025**, developing Faculty Self-Appraisal and Career Advisor platforms.
- Secured **3rd rank** at the state level in Class 10 and recognized as College Topper in Class 12.
